Sify Data Center: CHENNAI 02 CAMPUS

ADDRESS:
H11/A, Sipcot IT Park, Siruseri, Chennai, Tamil Nadu 603 103, India.

Tried. Tested. Trusted.
For over 22 years now
India’s leading digital infrastructure partner

Sify: The Data Center Pioneer!

As a pioneer Data Center Service Provider in India, Sify holds an undeniable advantage in offering every data center service - be it colocation, edge computing, network services, cloud services, digital services or system integration services. The technologies implemented in our data centers are the outcome of many years of data center operations and setting new industry benchmarks on par with the best practices in the South and tailored to the Indian ICT ecosystem. All our data centers are strategically located across different geographic locations, are concurrently maintainable, and complement each other as a data center or disaster recovery center.

The new Hyperscale Data Center campus, Chennai 02 in Siruseri, has 78 MW IT capacity and 13000+ racks with dense fiber deployment from various providers, enabling high capacity, low latency, and resilient network access across distributed data center sites. The campus has integrated Cable Landing Station (CLS) for transpacific fiber access. The CLS is away from port, fishing zones, oil blocks and all existing subsea cables.

The campus is strategically located close to business parks to serve the nearby IT hub and is well-connected by air, rail, and road transport systems. This carrier-neutral facility has dual Meet-Me-Rooms and onboards multiple telecom service providers, Internet Exchanges for redundant and robust telecom network facilities to customers. The strategic position of this data center will enable organizations from Hyperscalers, OTT, Manufacturing, IT/ITeS, BFSI, Healthcare and Pharma sectors to run their mission-critical applications.
Data Center Campus: Advantages

- Hyperscale campus with **78 MW** IT capacity and **13000+** racks.
- **3 Towers** of 26 MW each

- **4 Fiber entry paths** into the Data Center campus, with diverse fiber paths to each building

- **6300 mm** floor to floor height

- **Integrated Cable Landing Station** for Transpacific fiber access with 800-1000 Tb/s capacity

- **Multiple options** for Private power and Renewable power

- **Built-to-Suit** towers to single cabinet deployment

- **4 clear access paths** to the Data Center campus from the main road, enables easy logistics movement

- **2100 kg/sqm** floor load bearing capacity

- **10 Levels** physical & electronic security. **K4** rated perimeter

- On-premises **220 KV** GIS substation

Data Center Campus: Key Facts

**Data Center Shell Building**

- RCC shell and core Floors G+7
- **Data Hall Room Height**: 6300 mm slab to slab. 5100 mm clearance from slab to bottom of beam.
- **Floor Type**: Raised, 900 mm.
- **Structural Design**: IS 456:2000, Importance Factor 1.5.
- **Structural Floor Loading**: 2100 kg/sqm.
- **Freight Elevators**: 2 freight elevators with 4-ton capacity.
- **Fire Rating of Walls & Doors**: 2 hours.

**Electrical**

- **Utility feed configuration**: Onsite electrical substation on High Voltage feeder.
- **Design Power Capacity**: Designed for 78 MW IT capacity.
- **Independent Floor Design**: 4320 kW per floor power deployment. 2 x 2520 kW power PODs.
- **Power Density**: Average Power density of 8-13 kW per rack.
- **Transformer/Generator Configuration**: N+2, N+2C, N+N/3.
- **Downstream Power Configuration**: N+N downstream power distribution with overhead bus bars.
- **Onsite Fuel Storage**: 30 hours, with 2 geo-diverse fuel re-supply contracts.
Data Center Campus: Key Facts

**Building Management Systems**
- **Building Management**: Integrated building automation system with PLC SCADA.
- **Physical Security**: Perimeter protection with Electric fence and Intrusion detection, Access controlled Gates and Hydraulic crash guards, Security control room, X-ray Baggage scanner, 24x7 security guard service.
- **Access Control**: Smart card and biometric.
- **Video Surveillance**: 24x7 for all critical areas, retention for 90 days.
- **Fire Detection**: Addressable smoke detectors and aspirating smoke detectors for early warning.
- **Fire Suppression**: Novec© 1230 fire suppression system for Data Center and electrical rooms. Option for pre-action Water sprinklers available.

**Cooling**
- **Chiller**: Air cooled chillers with high water temperature and adiabatic cooling accessories. N+2 redundancy.
- **Environment**: Temperature and Humidity as per ASHRAE standards.
- **Containment**: Hot or Cold Aisle Containment.

**Network**
- **MMR**: Dual meet me rooms for telecom fiber links; N+N power with UPS and 5 minutes battery backup.
- **Carrier Neutral**: Multiple IXs, IP Transit POPs, Multiple Telecom MUXs.
- Four telecom entry paths to the MMR.
- MDF (Network Closet) in every floor, connected to MMR via 4 network risers.

**Proposed Certifications**

Fast track your digital transformation journey with a more agile, resilient, scalable, digital-ready IT infrastructure supported by a trusted partner who is charting India’s digital growth story.
